

TECHNICAL DATA SHEET

SFF RE-FILL PLUS[®]

!GOOD INTESTINAL HEALTH AND MORE PRODUCTION!

Product Information

SFF QA 01 version 01 08 2022

Sanitary Registration Ecuador: SCI-R004350

Warehouse Registration: BIA-8077

DESCRIPTION

SFF Re-Fill Plus[®] is a mixture of natural concentrated phytobiotic powders to be incorporated into balanced feed for animal use, improving digestibility and survival. The product has immunostimulating, bacteriostatic and antiparasitic properties..

Phytobiotics are pure substances extracted from plants in the form of powder, essential oils from herbs, leaves, roots or fruits, which act against pathogenic bacteria and are added to balanced feed to improve zootechnical production parameters. The emergence of antibiotic resistant bacteria has created the need to replace antibiotics with other products such as prebiotics, organic acid botanicals, and herbal essential oils. Good intestinal health is very important from the birth of the animal until the end of its productive cycle, favoring the most efficient use of feed and the expression of its productive genetic potential.

Regarding the properties of the ingredients, we can say that the condensed tannins of the quebracho and chestnuts have natural antiparasitic properties. Sapindus Mukurossi Nut powder has immunostimulating properties. Short-chain fatty acids and prebiotics feed beneficial flora. Humic acids are natural chelators and toxin traps, essential oils confer antibacterial and antiparasitic properties, promote digestibility in the animal.

Pharmaceutical Form: Brown powder

Solubility: Not soluble in water

Size: 25kg (55lbs)

Material: Kraft paper lining bag.

Storage temperature: 2-25°C / 36-77°F

Conditions: Cool, dry and free of rodents. Do not stack more than 5 units stacked

Expiration: 24 months from the date of production

COMPOSITION

| Name | Ingredients | Concentration |
|------------------|---------------------------------------------------------------------------------------------------------------------|---------------|
| Antiparasitic | Condensed and soluble tannins of Quebracho (<i>Schinopsis lorentzii</i>) and Chestnuts (<i>Castanea sativa</i>) | 30.0% |
| Prebiotics | Butyric acid monoglycerides | 25.0% |
| Toxin trapper | Humic acids | 18.0% |
| Prebiotics | Potato starch | 10.0% |
| Antibacterial | Oregano, thymol, cinnamon and clove oils | 7.0% |
| Excipient | Diatomaceous earth | 7.0% |
| Immune stimulant | Sapindus Mukorossi Nut Powder | 3.0% |

GUARANTEED ANALYSIS

| Analysis | Limits |
|------------------------|---------------------|
| Tannin concentration | 18% Min |
| Microbiologic analysis | |
| Total coliforms | < 10 cfu/g |
| Fecal coliforms | < 10 cfu/g |
| Salmonella | Absence in 25 grams |

Composition: Condensed and soluble tannins from Quebracho (*Schinopsis lorentzii*) and Chestnuts (*Castanea sativa*), Monoglycerides of butyric acid, Humic acids, Starch Potato, Thymol, Cinnamon and Clove Oregano Oils, Diatomaceous Earth, Walnut Sapindus Mukurossi powder.

RECOMMENDED DOSE

Mix SFF Re-Fill Plus ® at a dose of:

In aquaculture

From 5 to 10 kg per MT as a preventive
From 30 to 50 Kg per MT as curative.

In Poultry and Pigs

4 Kg per MT as a preventive
8 -10 Kg per MT as curative

A homogeneous mixture must be made.
To be managed throughout the production cycle.
It can be used in pelleted feed

INSTRUCTIONS FOR USE

To be managed throughout the production cycle.

WITHDRAWAL TIME

They do not have times in withdrawal periods. They do not leave residues on meat or eggs.

MANAGEMENT

For its optimal effect, store it in a cool, dry and rodent-free environment. Avoid leaving the bag open for long periods of time. Avoid inhalation. In case of inhalation, skin or eye contact, rinse with water. A face mask must be worn if dust formation occurs. Not flammable. Not classified as chemical waste.
